

## GIVI scales on Meat Fillers Machine - Hydraulic vertical sausage fillers

The following case history is one of our most interesting application on Food Processing Machine.

The name of this kind of machine is Food Filling Machine, on the web you can find a lot of videos and, located on your region, a lot potential customers because the food machine are built all over the world.

In this case we are mostly talking about meat processing machine, but also the new age of vegetarian food is using the same technology. Have a look on this video to see how the customer can use our linear encoder on their machine:

<https://www.youtube.com/watch?v=CuqJlx7Jn8I>

In this case is a SCR 5 Z 0400 05VQ

On this kind of mechanical application, a solution with the GIVI MISURE GVS 215 linear encoder, magnetic version, could be a benefit for the self aligned sensor of our scale, gaskets for IP 67 protection, easy installation, reliability and price.

As the accuracy request is not so high, also solution with MTS sensor and relative magnetic band, could be a good opportunity.

**English:** Sausage Stuffers ;

**Russian:** Шприцы колбасные;

**Germany:** Wurstfüllmaschinen;

**France:** Pousoirs

**Spain:** Embutidoras

**China:** 灌肠机

Here you can find a short list of Factories around the world :
